METAL INDUSTRY

ELECTRICAL INDUSTRY

...TO INCREASE EFFICIENCY!

INNOVATIVE – ACTIVE HAND-MADE SUCCESS...

Reaching out together!

Working hand in hand with our customers, we are able to pick up ideas and trends as soon as they arise. This is the engine that drives the development of our innovative, high-quality tools. Our solutions create an added value that benefits our customers. Thanks to our close-knit consulting and servicing network we quickly recognize market trends and implement them in co-operation with our customers.

Helping people succeed!

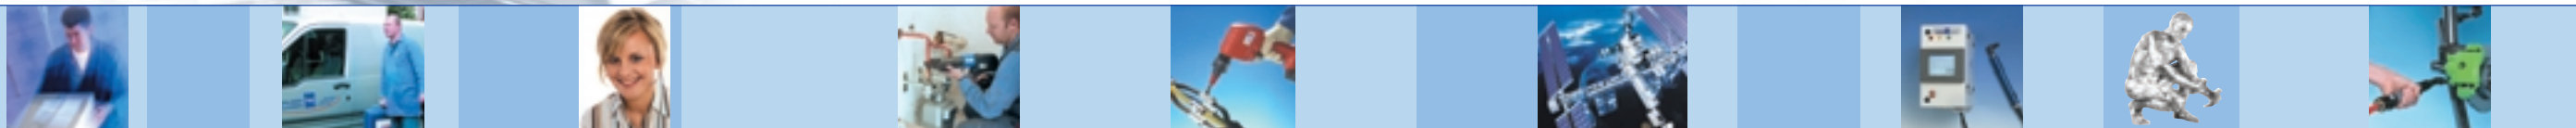

Competence means putting know-how into practice. In the course of human evolution, people have constantly acquired more knowledge. HOLGER CLASEN draws on expertise and experience from various fields and industries. By applying this knowledge to the development of tools and services, we enable our clients to achieve best-practice results.

HOLGER CLASEN builds custom-made high-quality, efficient tools, specifically designed for your needs. With a focus on performance, precision, and safety, our solutions set new standards, as for example the ELWA® (an electronic control and function monitoring device) integrated in our hydraulic tools as well as state-of-the-art shut-off clutches used in assembly tools to ensure highest production precision.

...CREATING THE FUTURE TOGETHER!

QUALITY ENSURES ADDED VALUE...

Our commitment to HOLGER CLASEN quality management ensures the high quality of all our products, services and business processes and obliges us to constantly improve the quality of our tools and services. We strive to discover emerging value adding potentials, evaluate them, and translate them into improvements.
