

Exhaust gas hoses

*For a clear head and
a clean environment.*

Carflex Super

Exhaust gas hose for exhaust gas temperatures **up to +200 °C***, **crush resistant**

Applications

Exhaust gas extraction of engine, suitable for all normal exhaust extraction systems such as: hose reel, slotted channels, abovefloor and underfloor suction extraction.

Standard production:

- DN 50 - DN 200
- Colour: black
- Production lengths: 2,5 m; 5 m; 7,5 m; 10 m; 12 m or coils 15 m

Temperature Range:

- exhaust gas temperatures up to +200 °C *

Carflex 200

Exhaust gas hose for exhaust gas temperatures **up to +200 °C***

Applications

Exhaust gas extraction of engine, suitable for all normal exhaust extraction systems such as: hose reel, slotted channels, abovefloor and underfloor suction extraction.

Standard production:

- DN 63 - DN 200
- Colour: black, outer abrasion protector: blue
- Production lengths: 2,5 m; 5 m; 7,5 m; 10 m; 12 m

Temperature Range:

- exhaust gas temperatures up to +200 °C *

Carflex 300

Exhaust gas hose for exhaust gas temperatures **up to +300 °C***

Applications

Exhaust gas from spark ignition or diesel engines, suitable for all usual suction extraction systems such as: hose reel, slotted channels, abovefloor and underfloor; suction extraction.

Standard production:

- DN 63 - DN 200
- Colour: green-grey, outer abrasion protector: red
- Production lengths: 2,5 m; 5 m; 7,5 m; 10 m; 12 m

Temperature Range:

- exhaust gas temperatures up to +300 °C*
